[Near-Surface Ozone Concentrations in the City of Auckland, New Zealand](#) Feb 07 2021 The research was aimed at studying ozone (O<sub>3</sub>) concentrations and the influence of the most relevant meteorological variables on an average coastal New Zealand city where precursor emissions are mainly due to traffic exhaust. It investigates the formation and transport mechanisms of O<sub>3</sub> in Auckland, with a view to developing novel strategies for its control and help minimizing the risk of exposure. The research focusses on the characterization of ambient concentration of O<sub>3</sub> in terms of diurnal, weekday/weekend, seasonal and spatial variations using O<sub>3</sub> measurements from the four air quality sites for the period October 1997-Oct 2001. It demonstrated that a unique feature of Auckland's air quality was the dilution of polluted city air due to the mixing of east coast air into the cleaner west coast circulation leading to overall lower average O<sub>3</sub> concentrations in summer.

The Evolution of Competition Law in New Zealand May 25 2022 The modern era of competition law in New Zealand began with the Commerce Act 1986. Since then, a steady and impressive corpus of case law had traversed all the usual major areas of antitrust law: cartels, resale price maintenance, exclusive dealing, tying, group boycotts, monopolization, mergers and acquisitions, exempted sectors, and the role of economic evidence. This volume explains the rationale for the various major reforms, the ongoing contestation between the Harvard and Chicago Schools of antitrust, and traces the developments of key concepts over the last 34 years. This title also explores systemic issues such as how well has New Zealand moulded its own competition law whilst nonetheless selectively drawing upon the policies, case law, and wisdom of foreign jurisdictions; how effectively has it faced the challenge of adapting its fledgling competition law to the reality of being a small, deregulated, open, and distant economy; and how successful was the application of competition law to utilities in the experimental era of 'light handed regulation'. Written by a New Zealand competition expert, this detailed, original, and comprehensive chronicle of New Zealand's competition law and policy draws together the common threads that mark the modern era and offers some predictions about how the next decades of New Zealand competition law might unfold.
