Jan 22 2022 The
Need for
Professional
Competence For all
the attention given
to the forensic
sciences in the
media and the law,
there is a glaring
deficiency in the
promotion of
standards of
competence. In the
midst of fascinating
scientific advances
in the field, forensic
science still suffers
embarrassments
from highly

publicized scientific
controversies and
shoddy or
fraudulent
practices. The
enactment of the
Daubert ruling,
which questions the
qualification of a
scientific “expert”,
demonstrates the
courts’ attempt to
regulate a
profession that
ought to be self-
regulating.
Libraries of books
on technique can do
nothing to promote
forensic science
without common
governing
standards of

practice that
ensures
professional
competence.
Common Ground
The first book of its
kind, *Ensuring
Competent
Performance in
Forensic Practice:
Recovery, Analysis,
Interpretation, and
Reporting* promotes
a common
understanding of
competence and
demonstrates the
application of
standards and
practice in all
aspects of forensic
science. Authors
Fereday and

Hadley, esteemed forensic scientists with forty and fifty years experience respectively, address the method and benefit of establishing occupational standards for collection of evidence, interpretation of scientific analysis, and appropriate methods of testimony. Training and Assessment The authors stress the standardization of proper training and testing procedures to ensure that every scientist employed in public and private practice has the credentials they require. They give clear guidelines for effective training programs based on occupational standards that

support the development of competent practitioners. The book examines the importance of workplace assessments of competence against occupational standards and emphasizes the role and quality of those involved in the assessment process. The authors include several case studies demonstrating competence in practice and the methods to ensure consistent high standards in the future.

BLM Apr 12 2021 The George Floyd riots that have precipitated great changes throughout American society were not spontaneous events. Americans did not suddenly

rise up in righteous anger, take to the streets, and demand not just that police departments be defunded but that all the structures, institutions, and systems of the United States—all supposedly racist—be overhauled. The 12,000 or so demonstrations and 633 related riots that followed Floyd's death took organizational muscle. The movement's grip on institutions from the classroom to the ballpark required ideological commitment. That muscle and commitment were provided by the various Black Lives Matter organizations. This book examines who

the BLM leaders are, delving into their backgrounds and exposing their agendas—something the media has so far refused to do. These people are shown to be avowed Marxists who say they want to dismantle our way of life. Along with their fellow activists, they make savvy use of social media to spread their message and organize marches, sit-ins, statue tumbings, and riots. In 2020 they seized upon the video showing George Floyd's suffering as a pretext to unleash a nationwide insurgency. Certainly, no person of good will could object to the proposition that "black lives matter"

as much as any other human life. But Americans need to understand how their laudable moral concern is being exploited for purposes that a great many of them would not approve.

Teaching History
for Justice Sep 29
2022 Learn how to
enact justice-
oriented pedagogy
and foster students'
critical engagement
in today's history
classroom. Over the
past 2 decades,
various scholars
have rightfully
argued that we
need to teach
students to "think
like a historian" or
"think like a
democratic citizen."
In this book, the
authors advocate
for cultivating
activist thinking in
the history
classroom.
Teachers can use
Teaching History

for Justice to show students how activism was used in the past to seek justice, how past social movements connect to the present, and how democratic tools can be used to change society. The first section examines the theoretical and research foundation for “thinking like an activist” and outlines three related pedagogical concepts: social inquiry, critical multiculturalism, and transformative democratic citizenship. The second section presents vignettes based on the authors’ studies of elementary, middle, and high school history teachers who engage in justice-oriented

teaching practices. Book Features: Outlines key components of justice-oriented history pedagogy for the history and social studies K-12 classroom. Advocates for students to develop “thinking like an activist” in their approach to studying the past. Contains research-based vignettes of four imagined teachers, providing examples of what teaching history for justice can look like in practice. Includes descriptions of typical units of study in the discipline of history and how they can be reimagined to help students learn about movements and social change. **Foreign Operations,**
