book features 300 close-up photos celebrating not only the BB guns, but also the water pistols, cork guns, and accessories that were deemed essential by young marksmen. Every item is accompanied by an informative capsule history that details its design, construction, notable features, and an assessment of its place in Daisy history. Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting. Air-powered guns offer many useful possibilities for informed shooters. First, we can mail-order both airguns and their ammunition, which don't fall under the jurisdiction of BATF (check your local regulations). Airguns also tend to be quiet - a useful advantage if low-impact hunting is necessary. The right choice will have adequate power for small game, and possibly even deer. From here it gets better since uninformed people will lump them all together as simple BB guns. In fact, airguns still maintain social acceptance not only domestically, but also around the globe. As a result, sophisticated designs have evolved with outstanding performance. Some are even sold in head-turning calibers like 9mm, .45, or .50-caliber! On a smaller and more affordable scale, we can also improve our all-around shooting skills while having some low-cost fun. Since an understanding of the various power-plants is essential, this thorough and complete guide will provide the necessary information for its purchase and use. Ever since Myanmar regained her independence in January 1948, the Tatmadaw (Myanmar Armed Forces) has been crucial in restoring and maintaining law and order. It is one of the most important institutions in Myanmar politics. Various aspects of the Tatmadaw have been studied. The most notable area of study has been the political role of the military. This study looks at the organizational development of the Myanmar armed forces. It analyses four different aspects of the Tatmadaw: military doctrine and strategy, organization and force structure, armament and force modernization, and military training and officer education. It sets out security perceptions and policies, charting developments in each phase against the situation at the time, and also notes the contributions of the leading actors in the process. Since early 1990s, the Tatmadaw has implemented a force modernization programme. This work studies rationales and strategy behind the force modernization programme and examines the military capabilities of the Tatmadaw. Drawing extensively from archival sources and existing literature, this empirically grounded research argues that, while the internal armed security threat to the state continues to play an important role, it is the external security threat that gives more weight to the expansion and modernization of the Tatmadaw since 1988. It also argues that, despite its imperfections, the Tatmadaw has transformed from a force essentially for counter-insurgency operations into a force capable of fighting in limited conventional warfare.
