The Collected Papers of Albert Einstein, Volume 14 Feb 19 2022
The more than one thousand letters and several dozen writings included in this volume cover the years immediately before the final formulation of new quantum mechanics. The discovery of the Compton effect in 1923 vindicates Einstein's light quantum hypothesis. Niels Bohr still criticizes Einstein's conception of light quanta and advances an alternative theory, but Walther Bothe and Hans Geiger perform a difficult experiment that decides in favor of Einstein's theory. At the same time, Satyendranath Bose sends a new quantum theoretical derivation of Planck's law to Einstein and he discovers what is now known as Bose-Einstein condensation. Einstein attempts to reformulate a unified theory of the gravitational and electromagnetic fields. In early November 1923, Einstein flees overnight to the Netherlands in the wake of threats on his life and anti-Semitic rioting in Berlin. He rejoins the International Committee on Intellectual Cooperation in June 1924, and supports the idea of a European union. He joins the board of governors of Hebrew University, which opens in April 1925, and celebrates the event in Buenos Aires while on a seven-week lecture tour of Argentina, Uruguay, and Brazil. During this period, he delivers lectures, meets with heads of state, visits major institutions, and attends receptions hosted by the local Jewish and German communities. He has a serious, but short-lived, falling out with his son Hans Albert and his first wife Mileva Maric-Einstein over how to invest part of the Nobel Prize money and he rescues his sister Maja and her husband from debt on their house. Einstein has a fourteen-month romantic relationship with his secretary, Betty Neumann, which he ends in October 1924.

The Best Horror of the Year Volume 3 Jan 01 2023
A doctor makes a late-night emergency call to an exclusive California riding school; a professor inherits a mysterious vase... and a strange little man; a struggling youth discovers canine horrors lurking beneath the streets of Albany; a sheriff ruthlessly deals with monstrosities plaguing his rural town; a pair of animal researchers makes a frightening discovery at a remote site; a sweet little girl entertains herself... by torturing faeries; a group of

horror aficionados attempts to track down an unfinished film by a reclusive cult director; a man spends a chill night standing watch over his uncle's body; a girl looks to understand her place in a world in which zombies have overrun the earth; a murderous pack of nuns stalks a pair of Halloween revelers... What frightens us, what unnerves us? What causes that delicious shiver of fear to travel the lengths of our spines? It seems the answer changes every year. Every year the bar is raised; the screw is tightened. Ellen Datlow knows what scares us; the seventeen stories included in this anthology were chosen from magazines, webzines, anthologies, literary journals, and single author collections to represent the best horror of the year. Legendary editor Ellen Datlow (Lovecraft Unbound, Tails of Wonder and Imagination), winner of multiple Hugo, Bram Stoker, and World Fantasy awards, joins Night Shade Books in presenting The Best Horror of the Year, Volume Three. Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.

The Best American Comics 2019 Aug 28 2022
Jillian Tamaki, co-author of This One Summer, picks the best graphic pieces of the year. "The pieces I chose were those that stuck with me, represented something important about comics in this moment, and exemplified excellence of the craft. Surveying the final collection, I'm moved by the variety of individual approaches. There are so many ways to make us care about little marks on a page."—Jillian Tamaki, from the introduction
The Best American Comics 2019 showcases the work of established and up-and-coming artists, collecting work found in the pages of graphic novels, comic books, periodicals, zines, online, in galleries, and more, highlighting the kaleidoscopic diversity of the comics form today. Best Crime Stories of the Year Volume 2 Apr 11 2021 International bestselling author Sara Paretsky selects the twenty best mystery short stories of the year, including tales by Michael Connelly, Jo Nesbo, Joyce Carol Oates, Colson Whitehead, and more in this crime connoisseur's collection. Under the auspices of New York City's legendary mystery fiction specialty bookstore, The Mysterious Bookshop, and aided by Edgar Award-winning anthologist Otto Penzler, international bestseller and MWA Grandmaster Sara Paretsky has selected the twenty most puzzling, most thrilling, and most mysterious short stories from the past year, collected now in one entertaining volume. The classic mystery tale will be familiar to aficionados and casual readers alike: it was invented by Edgar Allen Poe, popularised by Arthur Conan Doyle, and perfected by Agatha Christie. Within a few pages, a clue can be discovered, divulged, and its significance determined: all else is mere embellishment. Featuring stories by: Doug Allyn, Colin Barrett, Jerome Charyn, Michael Connelly, Susan Frith, Tom Larsen, Sean Marciniak, Stefon Mears, Keith Lee Morris, Gwen Mullins, Jo Nesbo, Joyce Carol Oates, Annie Reed, Kristine Kathryn Rusch, Anna Scotti, Ginny Swart, Ellen Tremiti, Joseph S. Walker, Colson Whitehead, and Michael Wiley - plus a bonus vintage story from the annals of mystery fiction, written over a century in the past.

History of Technology Volume 9 Nov 18 2021 The technical problems confronting different societies and periods, and the measures taken to solve them form the concern of this annual collection of essays. Volumes contain technical articles ranging widely in subject, time and region, as well as general papers on the history of technology. In addition to dealing with the history of technical discovery and change, History of Technology also explores the relations of technology to other aspects of life -- social, cultural and economic -- and shows how technological development has shaped, and been shaped by, the society in which it occurred.

The Collected Papers of Albert Einstein, Volume 15 Mar 23 2022 This volume covers one of the most thrilling two-year periods in twentieth-century physics, as matrix mechanics—developed chiefly by W. Heisenberg, M. Born, and P. Jordan—and wave mechanics—developed by E. Schrödinger—supplanted the earlier quantum theory. The almost one hundred writings by Einstein, of which a third have never been published, and the more than thirteen hundred letters show Einstein's immense productivity and hectic pace of life. Einstein quickly grasps the conceptual peculiarities involved in the new quantum mechanics, such as the difference between Schrödinger's wave function and a field defined in spacetime, or the emerging statistical interpretation of both matrix and wave mechanics. Inspired by correspondence with G. Y. Rainich, he investigates with Jakob Grommer the problem of motion in general relativity, hoping for a hint at a new avenue to unified field theory. Einstein falls victim to scientific fraud when, in a collaboration with E. Rupp, he becomes convinced that the latter's experiments, aimed at deciding whether excited atoms emit light instantaneously (in quanta) or in a finite time (in waves), confirm a wave-theoretic explanation. While it was known that the teenage Einstein had been romantically involved with Marie Winteler in 1895, newly discovered documents reveal that his love for Marie was rekindled in 1909-10 while he was still married to Mileva Marić. The 1925 Locarno Treaties renew Einstein's optimism in

European reconciliation. He backs the "International manifesto against compulsory military service" and continues his participation in the League of Nations' International Committee on Intellectual Cooperation. He remains intensely committed to the shaping of the Hebrew University in Jerusalem, although his enthusiasm for this cause is sorely tested.

Fast Forward Files Volume 2 Jun 13 2021 Escape your echo chambers and free your mind: this book is an essential read for everyone invested in tomorrow's world. It is a compelling compendium of essays, articles and expert overviews, written by some of the world's leading authorities on future-critical issues as diverse as leadership, genetics, psychological profiling, marketing, health, memory and more. It explores the need for new ethical frameworks for this fast-moving world, and confronts the reader to challenge the status quo in order to embrace coming advances in technology, engineering and human insights. The book takes an honest and very human appraisal of where we are now, and where to go next, exploring how we live, work and collaborate - today, tomorrow and beyond. *5 paperbacks in a slipcase*
