Attachment, Evolution, and the Psychology of Religion Jul 28 2022 In this provocative and engaging book, Lee Kirkpatrick establishes a broad, comprehensive framework for approaching the psychology of religion from an evolutionary perspective. Kirkpatrick argues that religion is a collection of byproducts of numerous psychological mechanisms and systems that evolved for other functions.

Learning to Float Sep 17 2021 Lili Wright is a thirty-something woman on the emotional lam. Faced with a choice between two men--Stuart, the steady veterinarian, and Peter, the dreamy writer--she climbs into her car and leaves them both behind. With only a borrowed dog named Brando for company and a map of twelve states in her pocket, Lili sets out on a road trip, hoping that by setting herself in motion she will find a way to settle down. Charting a course from Cadillac Mountain in Maine to the faded glory of Key West, Florida, she camps out on beaches and crashes on couches, in sketchy motels and even in a cop's trailer. She travels not only south, but also back in time, trying to figure out why previous relationships with a Nantucket waiter, a French tennis clown, a Utah ski bum, and others flared and fizzled. Along the way, Lili meets a string of unlikely gurus, including a well-worn shrimper, a vegan astrologer, and even a woman who marries herself. These and other unassuming strangers offer offbeat wisdom and guidance as Lili struggles to understand the nature of love, the voodoo of sex, and how couples can settle down without settling for. Between adventures, Lili tackles tough questions: Why does everything love touches turn risky? Does staying with the same person mean staying the same? Where does love come from, and where does it go? By journey's end, this restless traveler begins to see how she can share her life with just one other person, and how love, like water, can make a body float. Lili Wright's engaging memoir from the road updates the tradition of the picaresque traveler's tale. With unflinching honesty and refreshing wit, she captures the torn emotions, comic misfires, and inevitable trade-offs felt by young people everywhere.

Kabbalah, Hermeticism and M-theory Jun 26 2022 M-theory, the latest attempt by scientists to formulate a grand theory of everything, is doomed to failure from the outset. Why? Because it ignores the unextended domain outside space and time, the domain of zero and infinity. M-theory explicitly sets out to prevent the appearance of zero and infinity in any of its equations. It is the last will and testament of materialism, its concluding grand folly before it confronts the truth of an immaterial partner to the material world. So, here is the tale of the cosmos. We will take you on the

strangest journey from Kabbalism, Zoroastrianism, Manichaeism, Gnosticism, Hermeticism, Rosicrucianism, Platonism, Neoplatonism, the Emerald Tablet, the Golden Dawn, Aleister Crowley, the “perennial philosophy”, genies, Aristotle, entelechy, Forms and matter, mind and matter, universals and particulars, all the way to M-theory. Judge for yourself who has the better answers regarding the true nature of existence: scientists or the Pythagorean Illuminati.

Moral Tribes Jun 14 2021 A ground-breaking and ambitious book that promotes a new

understanding of morality, one that will help us to solve society's biggest problems. Our brains were designed for tribal life, for getting along with a select group of others (Us), and for fighting off everyone else (Them). But modern life has thrust the world's tribes into a shared space, creating conflicts of interest and clashes of values, along with unprecedented opportunities. As the world shrinks, the moral lines that divide us become more salient and more puzzling. We fight over everything from tax codes to gay marriage to global warming, and we wonder where, if at all, we can find our common ground. A grand synthesis of neuroscience, psychology, and philosophy, *Moral Tribes* reveals the underlying causes of modern conflict and lights a way forward. Our emotions make us social animals, turning Me into Us. But they also make us tribal animals, turning Us against Them. Our tribal emotions make us fight, sometimes with bombs, sometimes with words, and often with life-and-death stakes. Drawing inspiration from moral philosophy and cutting-edge science, *Moral Tribes* shows when we should trust our instincts, when we should reason, and how the right kind of reasoning can move us forward. Joshua Greene is the director of Harvard University's Moral Cognition Lab, a pioneering scientist, a philosopher, and an acclaimed teacher. The great challenge of *Moral Tribes* is this: How can we get along with Them when what they want feels so wrong? Finally, Greene offers a surprisingly simple set of maxims for navigating the modern moral terrain, a practical road map for solving problems and living better lives.

Rise of the Self-Replicators Oct 19 2021 Is it possible to design robots and other machines that can reproduce and evolve? And, if so, what are the implications: for the machines, for ourselves, for our environment, and for the future of life on Earth and elsewhere? In this book the authors provide a chronological survey and comprehensive archive of the early history of thought about machine self-reproduction and evolution. They discuss contributions from philosophy, science fiction, science and engineering, and uncover many examples that have never been discussed in the Artificial Intelligence and Artificial Life literature before now. In the final chapter they provide a synthesis of the concepts discussed, offer their views on the field's future directions, and call for a broad community discussion about the significant implications of intelligent evolving machines. The book will be of interest to general readers, and a valuable resource for researchers, practitioners, and historians engaged with ideas in artificial intelligence, artificial life, robotics, and evolutionary computing.

Computer Visualization for the Theatre Oct 31 2022 A fascinating introduction to the art of 3D modelling for theatre designers.

It's a Jungle in There Aug 17 2021 The saying "It's a jungle out there" refers to a competitive environment in which you'd better hone your skills if you hope to survive. And you'd better do what

you can to keep a roof over your head, food in your belly, a leaf on your loins, and a mate who'll help pass on your genes to the next generation of jungle Jims and Janes. Distinguished professor and cognitive psychologist David Rosenbaum takes this metaphor of surviving in the wild and applies it to the competitive arena within the brain. He argues that the overarching theory of biology, Darwin's theory, should be the overarching theory of cognitive psychology, the science of mental functioning. He explores this new and intriguing idea by showing how neural elements compete and cooperate in a kind of inner jungle, where only the fittest survive. Competition within your brain does as much to shape who you are as the physical and figurative competition you face externally. Just as the jungle night seethes with noisy creatures beckoning their mates, issuing their warnings, and settling their arguments, you might have trouble falling asleep at night because the thoughts in your head are fighting for their chance at survival. Rosenbaum's pursuit of this bold idea explains why we are shaped into who we are, for better or worse, because we are the hosts of inner battlefields. Written in a light-hearted tone and with reference to hypothetical neural "creatures" making their way in a tough environment, Rosenbaum makes cognitive psychology and his theory easy to understand and exciting to ponder. Rather than rely on the series of disconnected phenomena and collection of curiosities that often constitute cognitive psychology, *It's a Jungle in There* provides a fascinating way to place all cognitive phenomena under one flourishing tree.

The Mammoth Book of Time Travel SF Jul 16 2021 This thought-provoking collection not only takes us into the past and the future, but also explores what might happen if we attempt to manipulate time to our own advantage. These stories show what happen once you start to meddle with time and the paradoxes that might arise. It also raises questions about whether we understand time, and how we perceive it. Once we move outside the present day, can we ever return or do we

move into an alternate world? What happens if our meddling with Nature leads to time flowing backwards, or slowing down or stopping all together? Or if we get trapped in a constant loop from which we can never escape. Is the past and future immutable or will we ever be able to escape the inevitable? These are just some of the questions that are raised in these challenging, exciting and sometimes amusing stories by Kage Baker, Simon Clark, Fritz Leiber, Christopher Priest, Kristine Kathryn Rusch, Robert Silverberg, Michael Swanwick, John Varley and many others.

I Am God Mar 24 2022 Diabolically funny and subversively philosophical, Italian novelist Giacomo Sartori's I Am God is the diary of the Almighty's existential crisis that erupts when he falls in love with a human. I am God. Have been forever, will be forever. Forever, mind you, with the razor-sharp glint of a diamond, and without any counterpart in the languages of men. So begins God's diary of the existential crisis that ensues when, inexplicably, he falls in love with a human. And not just any human, but a geneticist and fanatical atheist who's certain she can improve upon the magnificent creation she doesn't even give him the credit for. It's frustrating, for a god. God has infinitely bigger things to occupy his celestial attentions. Yet he can't tear his eyes (so to speak) from the geneticist who's unsettlingly avid when it comes to science, sex, and Sicilian cannoli. Whatever happens, he must safeguard his transcendental dignity. So he watches—disinterestedly, of course—as the handsome climatologist who has his sights set on her keeps having strange accidents. And as the lanky geneticist becomes hell-bent on infiltrating the Vatican's secret files, for reasons of her own.... A sly critique of the hypocrisy and hubris that underlie faith in religion, science, and macho careerism, I Am God takes us on a hilarious and provocative romp through the Big Questions with the universe's supreme storyteller.

Infant Gender Selection & Personalized Medicine Dec 01 2022 Personalized medicine is what this book is about-tailoring your lifestyle, food, medicines, treatments, and reproductive choices to your genetic signature. According to Dr. Andrew Y. Silverman, MD, PhD, "The desire to influence the sex of the next child is probably as old as recorded history." "Gender selection is possible because of the way in which sex is determined by our chromosomes. Dr. Ericsson devised patented methods by which X and Y sperm can be separated through filtering processes. Sperm are "layered" over a column of human serum albumin, and they swim down the gradient where they are collected in the bottom layer. "The fraction of sperm that contains the male (Y) bearing sperm is used for insemination if a boy is desired. It is effective 70?75% of the time. "The fraction of sperm that contains the female (X) bearing sperm is used for insemination if a girl is desired. It is effective

70?72% of the time." Use personalized medicine more effectively. Empower consumers by interpreting DNA testing and learning more about infant gender choice by genetics.
