This new edition gives substantial and clear coverage of both criminal law doctrine and the theory behind it, striking a pleasing balance between the two. It is designed to be approachable and clear but with sufficient depth of analysis and discussion to ensure its suitability for both undergraduate and CPE/GDL courses. This is a reprint of a book first published by Little, Brown in 1978. George Fletcher is working on a new edition, which will be published by Oxford in three volumes, the first of which is scheduled to appear in January of 2001. Rethinking Criminal Law is still perhaps the most influential and often cited theoretical work on American criminal law. This reprint will keep this classic work available until the new edition can be published. Since the adoption of the Rome Statute of the International Criminal Court in 1998, international criminal law has rapidly grown in importance. This three-volume Treatise on International Criminal Law presents a foundational, systematic, consistent and comprehensive analysis of international criminal law. Taking into account the scholarly literature, not only sources written in English but also in French, German, Italian, Portuguese, and Spanish, the book draws on the author's extensive academic and practical work in international criminal law. This first volume addresses the foundations of international criminal law and the emerging general principles. It examines the history of the discipline and the concepts behind it. Looking at the sources of international criminal law, the book then moves to investigate the general structure of crime in international criminal law, and to address in detail the role played by the concept of individual criminal responsibility. The subjective requirements of criminal responsibility are examined, and also those defences that exclude such responsibility. The full three-volume treatise will address the entirety of international criminal law, re-stating and re-examining the fundamental principles upon which it rests, the manner it is enacted, and the key issues that are shaping its future. It will be essential reading for practitioners, scholars, and students of international criminal law alike. The purpose of this book is to find a unified approach to the doctrine of mens rea in the sphere of international criminal law, based on an in-depth comparative analysis of different legal systems and the

jurisprudence of international criminal tribunals since Nuremberg. Part I examines the concept of mens rea in common and continental legal systems, as well as its counterpart in Islamic Shari'a law. Part II looks at the jurisprudence of the post-Second World War trials, the work of the International Law Commission and the concept of genocidal intent in light of the travaux préparatoires of the 1948 Genocide Convention. Further chapters are devoted to a discussion of the boundaries of mens rea in the jurisprudence of the International Criminal Tribunals for the former Yugoslavia and Rwanda. The final chapter examines the definition of the mental element as provided for in Article 30 of the Statute of the International Criminal Court in light of the recent decisions delivered by the International Criminal Court. The study also examines the general principles that underlie the various approaches to the mental elements of crimes as well as the subjective element required in perpetration and participation in crimes and the interrelation between mistake of law and mistake of fact with the subjective element. With a Foreword by Professor William Schabas and an Epilogue by Professor Roger Clark From the Foreword by William Schabas Mohamed Elewa Badar has taken this complex landscape of mens rea at the international level and prepared a thorough, well-structured monograph. This book is destined to become an indispensable tool for lawyers and judges at the international tribunals. From the Epilogue by Professor Roger Clark This is the most comprehensive effort I have encountered pulling together across legal systems the 'general part' themes, especially about the 'mental element', found in confusing array in the common law, the civil law and Islamic law. In this endeavour, Dr Badar's researches have much to offer us. Smith and Hogan's Essentials of Criminal Law combines the authority you would expect from a Smith and Hogan title with succinct coverage and a wealth of student friendly learning features to aid study. Criminal Law is written with the needs of the student foremost in mind to provide, more than ever, as modern and as comprehensive an exposition of the criminal law as he or she could possibly require. 'Criminal Law' is written with the needs of the student foremost in mind to provide, more than ever, as modern and as comprehensive an exposition of the criminal law as he or she could possibly require. The book is the result of the conference "Substantive Criminal Law of the European Union" organised by the Criminal Law Department of Maastricht University on 20 and 21 January 2011, with the generous support of the Faculty of Law of Maastricht University, the Koninklijke Nederlandse Academie van Wetenschappen, the Department of Criminal Law and Criminology of Maastricht University and the Hague Institute for the Internationalisation of Law (HIIL). -- This work, a companion to Smith and Hogan: Criminal Law, is a collection of materials on those parts of the substantive criminal law which make up undergraduate courses. In addition to cases, the materials include statutes, reports, books

and articles arranged by subject matter. Introductory notes and commentary link the materials, and questions and problems illuminate and provoke thought about the issues raised. There have been major legislative changes in criminal law, eg. offences against the person, crime, disorder and theft. This edition brings the work up to date in the light of large changes in statute and case law. A companion to Smith and Hogan: Criminal Law this work provides all the necessary materials; cases, statutes, reports, extracts from books and articles, for an in-depth study of the general principles of criminal law. This edition has been updated to incorporate new legislation such as the Sexual Offences Act 2003 and relevant new case law. 'This book is a triumph in its clarity, scholarship and sheer scope. Diese rechtsvergleichende Untersuchung beschäftigt sich mit der Frage, wie Täterschaft und Teilnahme im Europäischen Wirtschaftsstrafrecht ausgestaltet sind. Besonderes Augenmerk richtet die Untersuchung auf die Frage der Strafbarkeit des Unternehmensleiters für deliktisches Verhalten seiner Untergebenen - eine zentrale und moderne Fragestellung aus dem Bereich von Täterschaft und Teilnahme. Der Vergleich wird anhand einer exemplarischen Betrachtung der Rechtsordnung Deutschland, Frankreich, Spanien, Österreich und Englands durchgeführt. Ashworth's Principles of Criminal Law, now in its ninth edition, takes a distinctive approach to the subject of criminal law, whilst still covering all of the vital topics found on criminal law courses. Uniquely theoretical, it seeks to enlighten the reader as to the underlying principles and theoretical foundations of the criminal law, critically engaging readers by contextualizing and analysing the law. This is essential reading for students seeking a sophisticated and critically engaging exploration of the subject. Online Resources The text is accompanied by online resources housing a full bibliography as well as a selection of useful web links. This is the new edition of the leading textbook on criminal law by Professors Simester and Sullivan, now co-written with Professors Spencer, Stark and Virgo. Simester and Sullivan's Criminal Law is an outstanding account of modern English criminal law, combining detailed exposition and analysis of the law with a careful exploration of its theoretical underpinnings. Primarily, it is written for undergraduate students of criminal law and it has become the set text in many leading universities. Additionally, the book is used as an important point of reference in academic writing and postgraduate research in England and abroad. Simester and Sullivan's Criminal Law has been cited by appellate courts throughout the world. Review of Previous Edition: '... undoubtedly a first-rate companion for any undergraduate or postgraduate law course. Since attaining international recognition and citation in appellate courts worldwide, the security of the text's position as a point of academic reference remains as steadfast as ever.' John Taggart, Criminal Law Review Simplification of Criminal Law : Public Nuisance and Outraging Public Decency: A Consultation Paper Papers originally presented at a conference organized by the

University of Bristol Centre for Law and Gender Studies, held in Bristol in July 1999. Ormerod and Laird present a thorough yet accessible student guide to the criminal law, supported by a wealth of key extracts from judgments, statutes, reports, and academic articles. Aims to present a unified picture of the core aspects of Australian criminal law. By defining appropriate boundaries for the defence of insanity and the doctrine of automatism, this book presents a consistent and principled approach to the reform of mental state defences. In particular, by undertaking an interdisciplinary analysis of the various factors that inform these defences the book concludes with several practical and robust reform proposals. There are three objectives that underpin the suggested reform proposals. First, to ensure that an accused will be able to raise a defence of insanity for involuntary conduct arising from mental disorder even where he or she is aware of the nature and quality of such conduct. Second, to provide principled means by which to establish the criminal responsibility of an accused for conduct performed in a state of drug-induced psychosis. Third, to ensure that criminal conduct arising from a state of 'impaired consciousness' does not automatically result in the outright acquittal of an accused. In articulating the competing demands that must be balanced in order to secure a principled approach to the reform of mental state defences the book will be of relevance to all common law countries. Following on from an earlier consultation paper by the Law Commission (Consultation paper 173, ISBN 0117302597) published in October 2003, this report makes recommendations on the law and practice of the partial defences to murder of diminished responsibility and provocation, as covered by the Homicide Act 1957, with particular regard to domestic violence situations. It also considers whether there should be a partial defence to murder in cases involving the use of excessive force in self-defence. Appendices include sections detailing: research into the ways in which the law of provocation and diminished responsibility are working; a brief empirical survey of public opinion relating to partial defences to murder; a synopsis of sample cases of female defendants convicted of murder; and a sociological history of provocation and diminished responsibility. The Criminalization series arose from an interdisciplinary investigation into criminalization, focussing on the principles that might guide decisions about what kinds of conduct should be criminalized, and the forms that criminalization should take. Developing a normative theory of criminalization, the series tackles the key questions at the heart of the issue: what principles and goals should guide legislators in deciding what to criminalize? How should criminal wrongs be classified and differentiated? How should law enforcement officials apply the law's specifications of offences? This, the fifth book in the series, offers a historical and conceptual account of the development of the modern criminal law in

England and as it has spread to common law jurisdictions around the world. The book offers a historical perspective on the development of theories of criminalization. It shows how the emergence of theories of criminalization is inextricably linked to modern understandings of the criminal law as a conceptually distinct body of rules, and how this in turn has been shaped by the changing functions of criminal law as an instrument of government in the modern state. The book is structured in two main parts. The first traces the development of the modern law as a distinct, and conceptually distinct body of rules, looking in particular at ideas of jurisdiction, codification and responsibility. The second part then engages in detailed analysis of specific areas of criminal law, focusing on patterns of criminalization in relation to property, the person, and sexual conduct. Smith, Hogan, & Ormerod's Criminal Law is rightly regarded as the leading doctrinal textbook on criminal law in England and Wales. The book owes its consistent popularity to its depth of analysis, breadth of coverage, and accessible style. Over fifty years since the publication of the first edition, Professor David Ormerod and Karl Laird continue the tradition set down by Professors Sir John Smith and Brian Hogan by producing a textbook of unrivalled quality. The text continues to be an invaluable resource for undergraduate students and an essential reference source for criminal law practitioners. Digital formats and resources The sixteenth edition is available for students and institutions to purchase in a variety of formats, and is supported by online resources. The e-book offers a mobile experience and convenient access along with functionality tools, navigation features and links that offer extra learning support: www.oxfordtextbooks.co.uk/ebooks A selection of online resources accompany this text, including: - A selection of additional online chapters - A full bibliography arranged alphabetically and by chapter - Annual updates Smith and Hogan: Criminal Law provides a detailed and critical exposition of the general principles of criminal liability and the law of the most important crimes. This new edition has been made more digestible by dividing some of the longer chapters. It has been fully revised and takes account of recent very important case law, particularly the decisions of the House of Lords in B (a minor) and K (strict liability), Morgan Smith (provocation) and Hinks (theft). It includes statutory changes, particularly those made by the Sexual Offences (Amendment) Act 2000 and the--so far slight-- impact of the Human Rights Act 1998 on the substantive criminal law. Online Resources A range of online resources are provided to further a student's understanding, including video tutorials from the authors and students, examination questions with answer guidance from the authors, multiple choice questions, chapter summaries, and further reading. This book provides a refined definition of co-perpetration responsibility that could be uniformly applied in both the ad hoc- and the treaty-based (ICC Rome Statue) model of international criminal justice. Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides a practical analysis of criminal law in Hong Kong. An introduction presents the necessary background information about the framework and sources of the criminal justice system, and then proceeds to a detailed examination of the grounds for criminal liability, the justification of criminal offences, the defences that diminish or excuse criminal liability, the classification of criminal offences, and the sanctions system. Coverage of criminal procedure focuses on the organization of investigations, pre-trial proceedings, trial stage, and legal remedies. A final part describes the execution of sentences and orders, the prison system, and the extinction of custodial sanctions or sentences. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for criminal lawyers, prosecutors, law enforcement officers, and criminal court judges handling cases connected with Hong Kong. Academics and researchers, as well as the various international organizations in the field, will welcome this very useful guide, and will appreciate its value in the study of comparative criminal law.

In NATO Rules of Engagement, Camilla Guldahl Cooper provides a thorough analysis of NATO rules of engagement, and offers clarity on a concept which despite its considerable political, strategic and operational importance, is often misunderstood. Essay from the year 2013 in the subject Law - Criminal process, Criminology, Law Enforcement, grade: 80, University of Wales, Aberystwyth, language: English, abstract: The purpose of this essay is to explain and critically examine the scope of the defence of necessity and suggest its reform. We are said to face a crisis of over-criminalization: our criminal law has become chaotic, unprincipled, and over-expansive. This book proposes a normative theory of criminal law, and of criminalization, that shows how criminal law could be ordered, principled, and restrained. The theory is based on an account of criminal law as a distinctive legal practice that functions to declare and define a set of public wrongs,

and to call to formal public account those who commit such wrongs; an account of the role that such practice can play in a democratic republic of free and equal citizens; and an account of the central features of such a political community, and of the way in which it constitutes its public realm—its civil order. Criminal law plays an important, but limited, role in such a political community in protecting, but also partly constituting, its civil order. On the basis of this account, we can see how such a political community will decide what kinds of conduct should be criminalized – not by applying one or more of the substantive master principles that theorists have offered, but by considering which kinds of conduct fall within its public realm (as distinct from the private realms that are not the polity's business), and which kinds of wrong within that realm require this distinctive kind of response (rather than one of the other kinds of available response). The outcome of such a deliberative process will probably be a more limited, and a more rational and principled, criminal law. This volume brings together a collection of essays, many of them scholarly classics, which form part of the debates on three questions central to criminal law theory. The first of these questions is: what conduct should be necessary for criminal liability, and what sufficient? The answer to this question has wider implications for the debate about morality enforcement given the concern that the "harm principle" may have collapsed under its own weight. Secondly, essays address the question of what culpability should be necessary for criminal liability, and what sufficient? Here, the battles continue over whether the formulation of doctrines – such as the insanity defense, criminal negligence, strict liability, and others – should ignore or minimize the extent of an offender's blameworthiness in the name of effective crime-control. Or, are methods of accommodating the tension now in sight? Finally, essays consider the question of how criminal law rules should be best organized into a coherent and clarifying doctrinal structure. The structure grown by the common law process competes not only with that of modern comprehensive codifications, such as the American Law Institute's Model Penal Code, but also with alternative structures imagined but not yet tried. *Europäisches Strafrecht ist eine junge, dynamische Rechtsdisziplin, die sowohl strafrechtsrelevantes Völker-, Völkervertrags- und Gemeinschaftsrecht als auch gemeinschaftsrechtlich beeinflusstes nationales Strafrecht umfasst. Systematisch präsentiert das Lehrbuch den relativ unübersichtlichen, in zahlreichen Rechtsquellen supranationaler, völkerrechtlicher und nationaler Provenienz enthaltenen Rechtsstoff in Form eines Kanons "abfragbaren Wissens". Es beleuchtet die Rolle der Akteure des Europäischen Strafrechts ebenso wie die strafrechtsrelevanten Europäisierungsfaktoren. Plus: zahlreiche Fallbeispiele zum erfolgreichen Lernen.* This book looks at the relevance of conspiracy in international criminal law. It

establishes that conspiracy was introduced into international criminal law for purposes of prevention and to combat the collective nature of participation in commission of international crimes. Its use as a tool of accountability has, however, been affected by conflicting conceptual perceptions of conspiracy from common law and civil law countries. This conflict is displayed in the decisions on conspiracy by the international criminal tribunals, and finally culminates into the exclusion of punishment of conspiracy in the Rome Statute. It is questionable whether this latest development on the law of conspiracy was a prudent decision. While the function of conspiracy as a mode of liability is satisfactorily covered by the modes of participation in the Rome Statute, its function as a purely inchoate crime used to punish incomplete crimes is missing. This book creates a case for inclusion in the Rome Statute, punishment of conspiracies involving international crimes that do not extend beyond the conceptual stage, to reinforce the Statute's purpose of prevention. The conspiracy concept proposed is one that reflects the characteristics acceptable under both common law and civil law systems. Criminal cases raise difficult normative and legal questions, and are often a consequence of compelling human drama. In this collection, expert authors place leading cases in criminal law in their historical and legal contexts, highlighting their significance both in the past and for the present. The cases in this volume range from the fifteenth to the twenty-first century. Many of them are well known to modern criminal lawyers and students; others are overlooked landmarks that deserve reconsideration. The essays, often based on extensive and original archival research, range over a wide spectrum of criminal law, covering procedure and doctrine, statute and common law, individual offences and general principles. Together, the essays explore common themes, including the scope of criminal law and criminalisation, the role of the jury, and the causes of change in criminal law.
