A New Type of Single Valued Neutrosophic Covering Rough Set Model Nov 05 2020

Recently, various types of single valued neutrosophic (SVN) rough set models were presented based on the same inclusion relation. However, there is another SVN inclusion relation in SVN sets. In this paper, we propose a new type of SVN covering rough set model based on the new inclusion relation.

Layering of Size and Type Noun Constructions in English Apr 10 2021 On the basis of synchronic and diachronic data analysis, the volume takes a close look at the synchronic layers of binominal size noun and type noun uses (a bunch/a load of X; a sort of X; a Y type of X) and reconsiders the framework of grammaticalization in view of issues raised by the phrases under discussion. As a result, a construction grammar-approach to grammaticalization is developed which does justice to the syntagmatic lexical, or collocational, reclustering observed in the data within an eclectic cognitive-functional

approach.

Impact of the type of referring expression on the acquisition of word order variation
Mar 09 2021 This dissertation examines the impact of the type of referring expression on the acquisition of word order variation in German-speaking preschoolers. A puzzle in the area of language acquisition concerns the production-comprehension asymmetry for non-canonical sentences like "Den Affen fängt die Kuh." ("The monkey, the cow chases."), that is, preschoolers usually have difficulties in accurately understanding non-canonical sentences approximately until age six (e.g., Dittmar et al., 2008) although they produce non-canonical sentences already around age three (e.g., Poeppel & Wexler, 1993; Weissenborn, 1990). This dissertation investigated the production and comprehension of non-canonical sentences to address this issue. Three corpus analyses were conducted to investigate the impact of givenness, topic status and the type of referring expression on word order in the spontaneous speech of two- to four-year-olds and the child-directed speech produced by their mothers. The positioning of the direct object in ditransitive sentences was examined; in

particular, sentences in which the direct object occurred before or after the indirect object in the sentence-medial positions and sentences in which it occurred in the sentence-initial position. The results reveal similar ordering patterns for children and adults. Word order variation was to a large extent predictable from the type of referring expression, especially with respect to the word order involving the sentence-medial positions. Information structure (e.g., topic status) had an additional impact only on word order variation that involved the sentence-initial position. Two comprehension experiments were conducted to investigate whether the type of referring expression and topic status influences the comprehension of non-canonical transitive sentences in four- and five-year-olds. In the first experiment, the topic status of the one of the sentential arguments was established via a preceding context sentence, and in the second experiment, the type of referring expression for the sentential arguments was additionally manipulated by using either a full lexical noun phrase (NP) or a personal pronoun. The results demonstrate that children's comprehension of non-canonical sentences improved when the topic argument was realized as a personal pronoun and this improvement was independent of the grammatical role of the arguments. However, children's comprehension was not improved when the topic argument was realized as a lexical NP. In sum, the results of both production and comprehension studies support the view that referring expressions may be seen as a sentence-level cue to word order and to the information status of the sentential arguments. The results highlight the

important role of the type of referring expression on the acquisition of word order variation and indicate that the production-comprehension asymmetry is reduced when the type of referring expression is considered. --- Im Rahmen der vorliegenden Dissertation wurde der Einfluss des referierenden Ausdrucks auf den Erwerb von Wortstellungsvariationen bei deutschsprachigen Vorschulkindern untersucht. Eine zentrale Fragestellung im Spracherwerb betrifft die Asymmetrie zwischen Produktion und Verständnis. Diese Asymmetrie ist dadurch gekennzeichnet, dass sechsjährige Kinder oft Schwierigkeiten haben, Sätze in der nicht-kanonischen Wortstellung, z.B. „Den Affen fängt die Kuh.“, zu verstehen (z.B., Dittmar et al., 2008), obwohl bereits Dreijährige nicht-kanonische Sätze produzieren können (z.B., Poeppel & Wexler, 1993; Weissenborn, 1990). Um diese Asymmetrie zu untersuchen wurde in der Dissertation die Produktion und das Verständnis von nicht-kanonischen Sätzen betrachtet. In drei Korpusstudien wurde der Einfluss von Vorerwähntheit, Topikstatus und Wahl des referierenden Ausdrucks auf die Wortstellung in der Spontansprache von Zwei- bis Vierjährigen und in der kind-gerichteten Sprache ihre Mütter analysiert. Es wurde die Position des direkten Objektes in ditransitiven Sätzen untersucht, d.h., Sätze in denen das direkte Objekt vor oder nach dem indirekten Objekt in den satzmedialen Positionen stand, und Sätze in denen es in der satzinitialen Position stand. Die Ergebnisse zeigen ähnlich Abfolgemuster in der Satzproduktion der Kindern und Erwachsenen. Die Position des direkten Objektes, vor allem in den satzmedialen Positionen,

war zu einem großen Teil durch die Wahl des referierenden Ausdrucks vorhersagbar. Informationsstrukturelle Faktoren (z.B. Topikstatus) hingegen beeinflussten - unabhängig vom Einfluss des referierenden Ausdrucks - nur die Wortstellung in der satzinitialen Position. Zwei Verständnisexperimente wurden durchgeführt um den Einfluss des referierenden Ausdrucks und des Topikstatus auf das Verständnis von nicht-kanonischen transitiven Sätzen zu untersuchen. Im ersten Experiment wurde der Topikstatus eines der beiden Satzargumente durch einen vorherigen Kontext modifiziert. Im zweiten Experiment wurde zusätzlich der referierende Ausdruck modifiziert, d.h. das Topik wurde entweder durch eine lexikalische Nominalphrase (NP) oder ein Personalpronomen realisiert. Die Ergebnisse zeigen, dass vier- und fünfjährige Kinder Sätze in der nichtkanonischen Wortstellung besser verstehen konnten, wenn das Topik als Personalpronomen realisiert wurde, unabhängig von der grammatischen Rolle des Topiks. Das Satzverständnis war jedoch nicht verbessert, wenn das Topik als lexikalische NP realisiert wurde. Zusammengefasst zeigen die Ergebnisse der Produktions- und Verständnisstudien, dass der referierende Ausdruck als Hinweis auf die Wortstellung und auf den Informationsstatus der Argumente des Satzes von den Kindern genutzt werden kann. Sie unterstreichen somit die Bedeutung der Wahl des referierenden Ausdrucks auf den Erwerb von Wortstellungsvariation und zeigen, dass die Asymmetrie zwischen Produktion und Verständnis an Bedeutung verliert, wenn der referierende Ausdruck einbezogen wird.

The First Year: Type 2 Diabetes Dec 18 2021 Diagnosed with type-2 or non-insulin dependent diabetes in 1996, Gretchen Becker educated herself on every aspect of this chronic condition by reading medical books, talking with doctors, listening to her own body and using the Internet to communicate daily with other people with diabetes. Now, as a patient-expert, she guides all those newly diagnosed through everything they need to learn and do in the crucial first year after diagnosis. This indispensable guide simplifies but never patronises and offers a wider approach than any so far adhered to by doctors. It answers all the questions that assail the newly diagnosed: How to cope with daily maintenance? How to make sense of the terminology about measurement of blood-glucose levels? How to build self-knowledge and confidence? How, overall, best to adjust to life with diabetes.

The Type Specimen Book Jul 01 2020 This is a well designed type specimen book displaying samples of type that was available from V&M Typographic in the 1970s. The displays are of their metal type library and should prove helpful to anyone interested in the selection of type from large typographers at that time. There is a one line sample of each face at the beginning of the book. Anyone interested in type in the pre-digital world of type should find this book of interest

Not Your Type Sep 27 2022 Wenn du glaubst, dass man dich nicht lieben kann – und jemand es trotzdem tut. Einfühlsam, fesselnd und wunderbar romantisch erzählt Alicia Zett die Liebesgeschichte von Marie und Fynn im New-Adult-Roman »Not Your Type«, der überraschend zum SPIEGEL-Bestseller wurde. Die zwanzigjährige Studentin Marie ist in ihren stillen Kommilitonen Fynn verliebt, und auch Fynn empfindet für Marie mehr, als er sich selbst eingestehen will. Denn eigentlich lässt Fynn niemanden an sich heran: Keiner soll wissen, dass er trans ist. Einen wie ihn kann man nicht lieben, meint er. Doch dann finden sich Fynn und Marie unversehens mit einigen Freunden auf einem Roadtrip nach Italien wieder. Langsam kommen die beiden einander näher, das Mittelmeer als Ziel vor Augen. Jetzt muss Fynn sich entscheiden, wie viel er Marie anvertrauen kann, ohne sie für immer zu verlieren ... Der romantische New-Adult-Roman »Not Your Type« erzählt von einem Menschen, der erst lernen muss, dass er es wert ist, geliebt zu werden - so, wie er ist.

Die SPIEGEL-Bestseller-Autorin Alicia Zett weiß, wovon sie schreibt: Sie ist seit mehreren Jahren in der LGBT-Community aktiv und spricht auf ihren Social-Media-Kanälen mal auf ernste, mal auf humorvolle Weise über die Themen, die ihre Follower bewegen.

Mitsubishi Type 1 Rikko 'Betty' Units of World War 2 Dec 06 2020 The most produced Japanese bomber of the war the G4M saw action on every front from the first day of the Pacific conflict through to VJ-Day. The 'Betty's' very long range made it a key weapon during the opening year of the war. However, to achieve this, the aircraft was built with very little protective armour for its crew or fuel tanks, and Allied pilots soon exposed its extreme vulnerability. In the first in a series of volumes examining the key Japanese aircraft of WW2, Dr Osamu Tagaya details the G4M's extensive combat history, and lists all the units which operated the bomber.

Modular Neural Networks and Type-2 Fuzzy Systems for Pattern Recognition Jan 07 2021 This book describes hybrid intelligent systems using type-2 fuzzy logic and modular neural networks for pattern recognition applications. Hybrid intelligent systems combine

several intelligent computing paradigms, including fuzzy logic, neural networks, and bio-inspired optimization algorithms, which can be used to produce powerful pattern recognition systems. Type-2 fuzzy logic is an extension of traditional type-1 fuzzy logic that enables managing higher levels of uncertainty in complex real world problems, which are of particular importance in the area of pattern recognition. The book is organized in three main parts, each containing a group of chapters built around a similar subject. The first part consists of chapters with the main theme of theory and design algorithms, which are basically chapters that propose new models and concepts, which are the basis for achieving intelligent pattern recognition. The second part contains chapters with the main theme of using type-2 fuzzy models and modular neural networks with the aim of designing intelligent systems for complex pattern recognition problems, including iris, ear, face and voice recognition. The third part contains chapters with the theme of evolutionary optimization of type-2 fuzzy systems and modular neural networks in the area of intelligent pattern recognition, which includes the application of genetic algorithms for obtaining optimal type-2 fuzzy integration systems and ideal neural network architectures for solving problems in this area.

The Th2 Type Immune Response in Health and Disease Feb 08 2021 The type 2 immune response that develops during infectious disease has undergone major paradigm shifts in the last several years as new cell types and pathways have been identified. It is now clear that

the type 2 immune response, characterized by elevations in specific cytokines, including IL-4, IL-5 and IL-13, is associated with helminth infections in both humans and mice. This response is complex and includes effector functions that mediate resistance, contributing to expulsion and in some cases destruction, of the parasite. But just as importantly, the type 2 immune response can also mediate tolerance mechanisms, which can mitigate tissue injury as these large multicellular parasites transit through vital organs. The tolerance mechanisms include both tissue repair and immune regulatory effects. These latter aspects of the helminth-induced type 2 immune response are increasingly recognized as a potential resource that can be mined for the development of novel immunotherapies that may enhance wound healing, control of autoimmune and inflammatory diseases and regulation of metabolic homeostasis. In this book, leading researchers in this exciting and dynamic field discuss the latest findings and emerging concepts, providing an intellectual framework that can be used as a basis for new discoveries and potentially new treatments for diseases associated with inflammation.

Eat Right for Blood Type O Apr 22 2022 The Eat Right 4 Your Type portable and personal blood type guide to staying healthy and achieving your ideal weight. It's science! Different blood types mean different body chemistries. Eating foods that your blood type can process easily can help you lose weight and ward off illness - as well as giving you bags of energy. Based on your genetic make-up, EAT RIGHT 4 YOUR BLOOD TYPE means

eating foods that are compatible with your individual chemistry. If your blood type is O, then you will enjoy your best health on a high protein, low carbohydrate diet, and make sure you get plenty of animal protein. Carry this handy checklist with you wherever you go, so you can make the right food choices in the supermarket, while eating out or on holiday. Inside are complete listings of what's right for Type O in all of the main food, drink and supplement categories, so you can avoid putting on those extra pounds or feeling unwell from eating the wrong thing. Soon you'll be on your way to developing the perfect prescription plan for your type. The EAT RIGHT 4 YOUR TYPE portable and personal blood type guide to staying healthy and achieving your ideal weight.

What's Your Anger Type Jul 13 2021 Anger is a normal human emotion just as sorrow and happiness. Unfortunately, most times anger is expressed in non-productive and unacceptable ways which society deems as inappropriate. However, the good news is that we all have the ability to control anger. But how? This book shows the way. Describing various types of anger, it identifies their causes as well as precipitating factors, and finally offers effective ways to manage them. The different types of anger are explained with various scenarios and beautiful illustrations.

Type-2 Fuzzy Granular Models May 11 2021 In this book, a series of granular algorithms are proposed. A nature inspired granular algorithm based on Newtonian gravitational forces is proposed. A series of methods for the formation of higher-type information granules represented by Interval Type-2 Fuzzy Sets are also shown, via multiple approaches, such as Coefficient of Variation, principle of justifiable granularity, uncertainty-based information concept, and numerical evidence based. And a fuzzy granular application comparison is given as to demonstrate the differences in how uncertainty affects the performance of fuzzy information granules.

The 12-Type Enneagram May 23 2022 There exists a totally unknown system that codifies the very specific manner in which we think, feel and behave. It reveals the influence on us of planetary energies. The 12-Type Enneagram is completely original, and it reveals 12 planetary essence types. We all have every one of the type energies, but they exist in lesser or greater concentrations. Only one, though, is our essence type (not personality type). Unlike the 9-Type Enneagram, which concentrates on personality, the 12-Type Enneagram focuses on planetary essence types. There are 6 main types and 6 hybrid types, all of which are linked to a planet: Mercury, Saturn, Mars, Jupiter, Venus and Lunar. In The 12-Type Enneagram, Matthew Campling helps you identify your type via a series of questions and then provides a detailed explanation of each type. Sections include family, friends, work, sex, love and relationships, and how we can consciously develop using the system. The 12-Type Enneagram will help you: Understand why others are different from you Help you deal with problems Show you what to work on to improve your life Help resolve inner and outer conflict and more. Up till now this knowledge has been lost, or

limited to esoteric schools of knowledge. Now it is available to us all.
