This book formulates a theory of global rhetoric encompassing Eastern and Western approaches. Based on the Field-Being philosophy, this book delves into the ontological foundations of both kinds of rhetoric and argues that both understandings are necessary for global communication. Since its founding by Jacques Waardenburg in 1971, *Religion and Reason* has been a leading forum for contributions on theories, theoretical issues and agendas related to the phenomenon and the study of religion. Topics include (among others) category formation, comparison, ethnophilosophy, hermeneutics, methodology, myth, phenomenology, philosophy of science, scientific atheism, structuralism, and theories of religion. From time to time the series publishes volumes that map the state of the art and the history of the discipline. Unter Insurance-Linked Securities (ILS) versteht man innovative Finanzprodukte, welche Versicherungsrisiken aus den eng abgegrenzten Märkten der Erst- und Rückversicherungswirtschaft herauslösen und mittels Verbriefung auf Kapitalmärkten handelbar machen. Durch ILS erhalten Investoren die Möglichkeit, für die Bereitstellung von Deckungskapital in Versicherungsrisiken zu investieren und im Gegenzug eine Versicherungsprämie zu erhalten. Hierbei verfolgt das Werk zwei Ziele. Zum Einen, die Durchführung einer genauen Analyse der zugrunde liegenden Zahlungsströme, der beworbenen Eigenschaften und jener Risiken, welche mit einer Investition in ILS verbunden sind. Zum Anderen, die Überprüfung der Anwendbarkeit und Passgenauigkeit vorgeschlagener versicherungsmathematischer und marktorientierter Bewertungsverfahren für ILS sowie die Unterbreitung möglicher Vorschläge für Bewertungsverfahren. Da ILS regelmäßig dazu verwendet werden Extremrisiken zu verbrieften, werden beide Untersuchungen unter expliziter Berücksichtigung der statistischen Eigenschaften von Extremrisiken durchgeführt. Im Ergebnis lässt sich festhalten, dass ILS Investitionen mit eigenen Spezifika darstellen. Investoren sollten diese kennen und berücksichtigen. Dies gilt gerade vor dem Hintergrund der stetig steigenden Zahl von ILS, welche insbesondere in den Zeiten der Niedrigzinsphase als attraktives Investment gesehen werden. Das Buch richtet sich an Investoren und Interessierte, die sich über ILS als Investitionen und deren Bewertung informieren möchten. This publication analyses where and why certain non-tariff measures are being applied to traded goods that are covered by multilateral rules and disciplines, and how they continue to represent challenges for exporters and policy makers. Western democracy is being questioned around the world. At the same time, Western aid groups are quick to say that they are not trying to impose a particular style of democracy on others and that they are open to supporting local, alternative forms of democracy. This book examines what it is about Western democracy that non-Westerners are reacting negatively to and whether the critics often are equating a dislike for certain Western social or economic features with an aversion to of Western political systems. It also explores the current state of debate about alternative forms of democratic practice in different regions—Asia, Africa, the Middle East, and Latin America—and then puts forward ideas about how Western actors engaged in democracy support can do a better job of incorporating new thinking about alternative democratic forms into their efforts. In recent years, the non-medical use of prescription drugs (NMUPD) has caused increasing public concern around the globe. Women constitute a special risk category for NMUPD and understanding gender as it relates to this phenomenon is now a critical requirement for effective policy and practice. Intended primarily for policy makers and researchers, this Pompidou Group publication aims to explore gender specificities in terms of the use and misuse of prescription drugs in Europe and the Mediterranean region. Using secondary sources, it also seeks to identify gaps in the data available in the area covered and to make recommendations for further research, coherent policy development and effective, gender-sensitive practice. This publication is an initial attempt to map this emerging phenomenon and to identify lacunae and avenues for further investigation. It constitutes an important resource for those interested in the interaction between gender and drug use. Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries. The dangers of political violence and the possibilities of non-violence were the central themes of three lives which changed the twentieth century—Leo Tolstoy, writer and aristocrat who turned against his class, Mohandas Gandhi who corresponded with Tolstoy and considered him the most important person of the time, and Nelson Mandela, prisoner and statesman, who read *War and Peace* on Robben Island and who, despite having led a campaign of sabotage, saw himself as a successor to Gandhi. Tolstoy, Gandhi, and Mandela tried to create transformed societies to replace the dying forms of colony and empire. They found the inequalities of Russia, India, and South Africa intolerable yet they questioned the wisdom of seizing the power of the state, creating new kinds of political organisation and imagination to replace the old promises of revolution. Their views, along with their ways of leading others, are closely connected, from their insistence on working with their own hands and reforming their individual selves to their acceptance of death. On three continents, in a

century of mass mobilization and conflict, they promoted strains of nationalism devoid of antagonism, prepared to take part in a general peace. Looking at Tolstoy, Gandhi, and Mandela in sequence, taking into account their letters and conversations as well as the institutions they created or subverted, placing at the centre their treatment of the primal fantasy of political violence, this volume reveals a vital radical tradition which stands outside the conventional categories of twentieth-century history and politics. This book contains the proceedings of the first International Workshop on Interval/Probabilistic Uncertainty and Non Classical Logics, Ishikawa, Japan, March 25-28, 2008. The workshop brought together researchers working on interval and probabilistic uncertainty and on non-classical logics. It is hoped this workshop will lead to a boost in the much-needed collaboration between the uncertainty analysis and non-classical logic communities, and thus, to better processing of uncertainty. Exploring the newly emerging field of the management of Non-Governmental Organizations (NGOs) working in developing countries, this informative book draws upon current research in non-profit management, development administration and business management. Key issues covered include: * the changing global and local contexts of development co-operation * management technologies such as empowerment and stakeholder analysis * structural issues such as accountability, governance and participation * learning and diversity * dealing with complexity and uncertainty. Illustrated throughout with examples drawn from the author's own research and consultancy experience, this important text develops a model of NGO management which reveals the distinctive organizational challenges they face. Syntactic dependencies are often non-local: They can involve two positions in a syntactic structure whose correspondence cannot be captured by invoking concepts like minimal clause or predicate/argument structure. Relevant phenomena include long-distance movement, long-distance reflexivization, long-distance agreement, control, non-local deletion, long-distance case assignment, consecutio temporum, extended scope of negation, and semantic binding of pronouns. A recurring strategy pursued in many contemporary syntactic theories is to model cases of non-local dependencies in a strictly local way, by successively passing on the relevant information in small domains of syntactic structures. The present volume brings together eighteen articles that investigate non-local dependencies in movement, agreement, binding, scope, and deletion constructions from different theoretical backgrounds (among them versions of the Minimalist Program, HPSG, and Categorical Grammar), and based on evidence from a variety of typologically distinct languages. This way, advantages and disadvantages of local treatments of non-local dependencies become evident. Furthermore, it turns out that local analyses of non-local phenomena developed in different syntactic theories (spanning the derivational/declarative divide) often may not only share identical research questions but also rely on identical research strategies. This new edition covers contemporary directions of non-equilibrium statistical mechanics as well as classical methods of kinetics. Supplementary material on the non-equilibrium statistical operator (NSO) method for calculating kinetics coefficients describing spintronics is included in this new addition. This book is an easy-to-read text describing the fundamentals of the field. This book argues that there is no way to make progress in building a sustainable future without extensive participation of non-state actors. The volume explores the contribution of non-state actors to a sustainable transition, starting with citizens and communities of different kinds and ending with cities and city-networks. The authors analyse social, cultural, political and economic drivers and barriers for this transition, from individual behaviour to structural restraints, and investigate interplay between the two. Through a series of wide-ranging case studies from the UK, Australia, Germany, Italy and Denmark, and a number of comparative case studies, the volume provides an empirically and theoretically robust argument that highlights the need to develop, widen and scale up collective action and community-based engagement if the transition to sustainability is to be successful. This book will be of great interest to students and scholars of climate change, sustainability and environmental policy. Mit der Novellierung des Universitätsgesetzes im Jahr 2021 geraten österreichische Hochschulen erstmals in die Lage, über die Schritte der Identifizierung, Dokumentation, Bewertung und Zertifizierung eigene Verfahren zur Validierung non-formal und informell erworbener Kompetenzen für die Anerkennung auf das Studienprogramm zu entwickeln. Mittels interdisziplinärer Zugänge geht der Sammelband der Frage nach, wie sich Verfahren zur Validierung non-formal und informell erworbener Kompetenzen gestalten und systematisch erfassen lassen. In Summe werden politische, bildungstheoretische, institutionelle, praktische als auch theoretische Perspektiven auf den Gegenstand geworfen. Der Sammelband zielt darauf ab, einen fundierten Überblick zur komplexen und vielschichtigen Thematik der Anerkennung und Validierung an Hochschulen zu eröffnen. Schwerpunkte liegen einerseits auf den gesetzlichen Rahmenbedingungen, andererseits auf institutionellen Zugängen und bereits existierenden Instrumenten im nationalen wie auch internationalen Raum. Abgerundet wird das Werk durch mögliche Entwicklungspotenziale, wobei insgesamt reichhaltige Impulse für die Gestaltung der Validierungsverfahren und weitere Forschung abgeleitet werden können. For the first time, an entire publication has been dedicated to providing a critical review of the identification and analysis of the milk specific proteins such as lactalbumin, lactoferrin and casein; the non-milk specific proteins such as plasma and membrane proteins; and the minor nitrogen-containing components such as enzymes, hormones, and growth factors. Biological roles, whether nutritional, endocrinological or immunological, of the specific nitrogen compounds in mammary milk production and/or growth and development of the breast-fed infant are also presented. Identification of the molecular weight compounds that have led to questions about their function in milk and their inclusion in modern infant formulas is thoroughly discussed and of great value to scientists in sub-specialties of biochemistry, nutrition, physiology and immunology, as well as to pediatric practitioners with primary interests in the infant food industry, academia, or clinical nutrition. The thoroughness of each chapter, often providing an historical panorama of the specific aspect of milk composition, makes this book useful for both the uninitiated and expert audiences who are interested in advancing their knowledge of human milk biochemistry and its physiological significance to the recipient infant. Recently, mutualistic endophytic *F. oxysporum* isolates were documented as candidates for biological control against plant parasitic nematodes. However, understanding their mechanisms of action toward *R. similis* was poorly known. The following can be summarized from the present findings: 1. Pathogenicity of endophytic *F. oxysporum* isolates toward *R. similis* Non-pathogenic endophytic *F. oxysporum* isolates directly affected *R. similis* survival in the absence of banana plants. In both synthetic media and in the soil, *F. oxysporum* isolates decreased mobility of *R. similis* when compare to the untreated controls. *F. oxysporum* was not shown to be a parasite of the nematode. Toxins in culture filtrates of *F. oxysporum* isolates Fo162 and V5W2 reduced mobility of *R. similis* in vitro; however the toxic effects were not lethal. 2. Colonization, plant growth promotion and vegetative compatibility of endophytic *F.oxysporum* The *F. oxysporum* isolates Fo162 and V5W2 not only colonized excellently on banana roots a short time after fungal application but also persisted in the root tissues for over 14 weeks. The *F. oxysporum* isolates also promoted banana growth in long term experiments in the absence of *R. similis*. The *F. oxysporum* isolates A1, Fo162 and V5W2 were shown to be unrelated genetically to the important pathogenic *Fusarium* wilt diseases of bananas and tomatoes by VCG testing. Therefore, these mutualistic endophytic *F. oxysporum* isolates are not only beneficial and non-pathogenic on bananas but also are not pathogenic to other crops. These results indicate that endophytic *F. oxysporum* isolates A1, Fo162 and V5W2 are strong candidates for biocontrol in the field. 3. Modes of action of non-pathogenic endophytic *F. oxysporum* isolates toward burrowing nematode *R. similis* on banana The *F. oxysporum* isolates reduced nematode penetration in banana plants when compared to untreated controls. The *F. oxysporum* not only reduced *R. similis* penetration, but also reduced nematode population density in banana root after 12 weeks. Timing, inoculum concentration and the ability of the *F. oxysporum* to colonize banana roots strongly influence the level of biological control activity against *R. similis*. *F. oxysporum* metabolites affected the mobility of *R. similis* in vitro but did not affect *R. similis* penetration

in soil. The endophytic *F. oxysporum* decreased attraction and the host finding ability of *R. similis*. *F. oxysporum* may induce toxic substances like pathogenesis related proteins, change root exudates that obstruct or repel attraction of *R. similis* to banana or reduce nematode recognition. All the isolates of *F. oxysporum* used induced systemic resistance against *R. similis* infestation in banana. Induced systemic resistance was clearly demonstrated to be the essential first step in the mode of action of non-pathogenic endophytic *F. oxysporum* and indicates that protection mainly results from initiation of induced systemic resistance coupled with changes in host finding ability. Changes in banana root proteins following treatment with *F. oxysporum* isolates Fo162 and V5W2 detected by 1D-SDS-Polyacrylamide gel electrophoresis were discovered. Small differences between fungal treatments and the controls were observed, however they were not clear and therefore should be analysed further with 2D- Polyacrylamide gel electrophoresis. A summary of state campaign finance laws with quick reference charts for the U.S. territories and possessions. This is a study of the phonological development of a family of L2 English learners. It is the first full-length book that focuses on a tightly-knit group of learners' acquisition of phonology over a longitudinal timeframe, and the first book to study both social and linguistic factors across that time period. Jette G. Hansen analyses this data gathered from actual language learners in the light of recent theory, as well as challenging aspects of current thinking on the subject of second language acquisition. *Acquiring a Non-Native Phonology* therefore makes an important and original contribution to the field and provides an in-depth analysis and discussion of the developmental processes in acquiring a non-native sound system which has not previously been presented. The book is aimed at academics interested in second language acquisition, and researchers studying phonology in general. Dr Ming-Yuan Wei currently holds a pending U.S. Patent Application entitled "Systems and Methods for High-Resolution Imaging". All other Guest Editors have no other competing interests to declare with regards to the Topic subject. To whom are armed opposition groups and business corporations accountable for their actions in armed conflict and in peace times? Are they responsible as a group? This pioneer book offers innovative theoretical and empirical analyses to these questions.
