Management Consulting Jan 15 2022 Widely recognized as a key reference work on the practice of consulting, this guide offers an extensive introduction to professional consulting, its nature, methods, organizational principles, behavioral rules, and training and development practices.

Today's information- and knowledge-based economy is constantly creating new opportunities and challenges for consultants. This new edition of Management Consulting actively reflects and confronts these developments and changes. New topics covered in this edition include: e-business consulting consulting in knowledge management total quality management corporate governance social role and responsibility of business company transformation and renewal public administration This book serves as a useful and inspiring tool for individuals and organizations wishing to improve their consulting activities. Praise for the previous edition: "A wealth of information about the nature and purpose of management consulting, consulting in various areas and the management of a consulting firm. It should help practitioners, entrants to the profession and business people wishing to use consultants more effectively." --Financial Times

Equal Shares Sep 11 2021 Equal Sharestell a fascinating story-the history of a group of dynamic tapestry workers who changed the economic life of their community. The authors examine a key community-based cooperative in Botswana that was launched in the early 1970s, and is hailed as a model for development and social change. With little formal education, virtually no job experience, still working their own agricultural lands, and many as single mothers, the co-op workers have maintained their business for over twenty-five years. Equal Shares is written in different voices, and tells the story of the defining moments in the lives of the Oodi Weavers. As the workers weave their village stories into the tapestries, the book weaves a story that depicts their evolving collective experience. It's a model of community action. Inspiring reading for all those fighting to take control of their economic lives.

Reorganizing the Factory Feb 16 2022 Winner of the 2003 Shingo Prize! Reorganizing work processes into cells has helped many organizations streamline operations, shorten lead times, increase quality, and lower costs. Cellular manufacturing is a powerful concept that is simple to understand; however, its ultimate success depends on deciding where cells fit into your organization, and then applying the know-how to design, implement and operate them. *Reorganizing the Factory* presents a thoroughly researched and comprehensive "life cycle" approach to competing through cellular work organizations. It takes you from the basic cell concept and its benefits through the process of justifying, designing, implementing, operating, and improving this new type of work organization in offices and on the factory floor. The book discusses many important technical dimensions, such as factory analysis, cell design, planning and control systems, and principles for lead time and inventory reduction. However, unique to the literature, it also covers in depth the numerous managerial issues that accompany organizing work into cells. In most implementations, performance measurement, compensation, education and training, employee involvement, and change management are critically important. These issues are often overlooked in the planning process, yet they can occupy more of the implementation time than do the technical aspects of cells. Includes: Why do cells improve lead time, quality, and cost? Planning for cell implementation Justifying the move to cells, strategically and economically Designing efficient manufacturing and office cells Selecting and training cell employees Compensation system for cell employees Performance and cost measurement Planning and control of materials and capacity Managing the change to cells Problems in designing, implementing, and operating cells Improving and adapting existing cells Structured frameworks and checklists to help analysis and decision-making Numerous

examples of cells in various industries

Global Manufacturing Management Jun 20 2022 Using site-specific optimization approaches in international manufacturing networks is increasingly proving insufficient. To solve this problem, several holistic and integrated alternatives have been developed to reflect a global perspective. This book presents advances in the St. Gallen Global Manufacturing Network Model and its application in numerous industry-, benchmarking- and research projects. The contents combine data-driven solutions with qualitative management frameworks for the strategic optimization of international manufacturing networks. In the first part, the book addresses the foundation of manufacturing network management and further describes the St. Gallen Operational Excellence approaches to manage plant performance. On this basis, the authors show how plant- and network-level performance can be enhanced via key improvement domains (e.g., strategy, configuration, coordination, performance management, digitalization). In turn, the second part demonstrates the application of the constructs in manufacturing companies from various industries. By combining research and practice, the book offers unique perspectives on the management of global production striving toward higher performance on manufacturing site and network level.

An Empirical study on the Effectiveness of Training at a Biscuit Manufacturing Factory in Bangalore,

India Mar 17 2022 Scientific Study from the year 2012 in the subject Business economics - Personnel and Organisation, Dayananda Sagar College of Engineering (Dayananda Sagar College of Engineering), course: Master of Business Administration, language: English, abstract: Abstract : Investing in people today through training has become very valuable for an organization's success in their industry. Today employee training has become critical to create a culture in which employees feel valued and entrusted with the organization's success. The objective of the paper was to analyse the various factors which contributes to effective training in the organization. The paper also analyses the relationship between training and organizational commitment of employees in a manufacturing unit of a national biscuit and confectionary brand. A questionnaire was developed which contained questions on the training conducted , how the training received by employees contributed to their performance in job, confidence level and taking up of higher responsibilities .This questionnaire was administered to 75 employees who are in the lower and middle managerial levels of a manufacturing Unit . A factor analysis was conducted to understand the major factors which contributed to the effectiveness of training. Also statistical tools like correlation was conducted to understand whether there is any relation between effectiveness of training conducted with organizational commitment .Analysis reveals primarily four factors like Organizational support in conducting training, Personal and professional development, Pre and Post training support, Training needs assessment and evaluation .It is also found that there is a positive relation between effectiveness of training and organizational commitment. Key words: organizational commitment, Training , effectiveness
