Kunst der Bewegung Apr 23 2022 Dieser Band versammelt

Beiträge aus der Kulturwissenschaft, Medientheorie, Linguistik und Philosophie, Kunst- und Literaturwissenschaft, mit einem Schwerpunkt in der Germanistischen Mediävistik.

Sie gehen auf eine Arbeitstagung an der Humboldt-Universität zu Berlin 2002 zurück und befassen sich mit dem grundsätzlichen Stellenwert, den Bewegung für kulturell je unterschiedliche Kommunikations- und Wahrnehmungsroutinen hat.

Im Hinblick auf eine historische Anthropologie medialer Praktiken wird untersucht, wie jemand als Wahrnehmender, das heißt, als Hörender oder Lesender, als Sehender und (sich) Spürender in Bewegung versetzt werden kann. Kinästhetik wird damit als transmediales Phänomen

aufgefaßt, als eine grundlegende Bedingung der Fähigkeit von Medien, Dinge wahrnehmbar zu machen, weil Wahrnehmung und Bewegung immer miteinander verbunden sind. Die Frage nach dem Kinästhetischen bezieht sich daher auf die spezifischen Erfahrungen, die verschiedene historische

Medienkonstellationen offerieren. Um das Zusammenspiel zwischen solchen Angeboten und den damit jeweils eingeforderten Aktualisierungen beschreibbar zu machen, das der doppelten Bestimmung von Wahrnehmung als Bewegung und Bewegtwerden korrespondiert, ist dem Band die Wendung auf die 'virtuellen Welten' eingeschrieben.

education under the auspices

of IFIP Technical Committee for Education (TC3). The

determined that the location

and conference topic reflect

the importance of issues facing

countries at all stages of development- especially Information Technologies (IT) development. Information Technologies have become, within a short time, one of the basic building blocks of modern industrial society.

Understanding IT, and mastering basic skills and concepts of IT, are now regarded as part of the core education of all people around the world, alongside reading and writing. IT now permeates the business environment and underpins the success of modern corporations as well as providing government with cost-effective civil service systems. At the same time, the tools and technologies of IT are of value in the process of learning, and in the organisation and management of learning institutions.
